## Ground Penetrating Radar Checklist

Project Name \_\_\_\_\_ Project Location \_\_\_\_\_

PO # \_\_\_\_\_ Job # \_\_\_\_\_ Fax # \_\_\_\_\_

**Job Contact:** Name \_\_\_\_\_ Phone \_\_\_\_\_ Email \_\_\_\_\_

**Company:** Name \_\_\_\_\_ Phone \_\_\_\_\_ Email for Invoicing \_\_\_\_\_

Billing Address \_\_\_\_\_

Date scanning needs to be completed \_\_\_\_\_ Jobsite hours \_\_\_\_\_ Thickness of the slab \_\_\_\_\_

Number of areas to be scanned/scope \_\_\_\_\_ Building floors (example 6<sup>th</sup> and 7<sup>th</sup> floor) \_\_\_\_\_

Concrete type: Elevated Pan Deck Post Tension Columns Slab on Grade Walls Ceilings

Floor Surface: Raw Concrete Carpet Stone/Marble Linoleum Roof Tile

Answer: **YES or NO**, for all the following items:

Live conduits or fire alarm in the slab?	
Walker duct in the slab?	
Exterior or outdoor scanning required?	
Hardhats required?	
Lien release needed?	
Is this a certified payroll job?	
Customer or trades examine ceilings below for obstructions prior to technicians arrival?	
Customer understands the capabilities and limitations of this technology?	
Drill spotting required? (If so, additional charges may apply)	
Formal scan report required? (If so, additional charges will apply)	
Vendor Set-up Requirements - Subcontractor agreement, security, or other paperwork needed before work begins?	
Metal track, drywall, studs, and debris removed and work area clean, prior to technician's arrival?	
Any scan locations on tile, mud beds, plywood, wood floors, roof foam insulation or terracotta?	
Is the concrete less than 6 month old (poured)?	
Security training or security escorts needed to gain access to site?	
Ceiling scanning required? If so, customer supplied scaffolding/ladder required. (Additional charges will apply)	
Certificate of insurance required before work begins? (If yes, indicate any special text required that must show on this certificate)	

**Metro Concrete Scanning Corporation 17 Linden Ave, Annapolis, MD 21401  
240-882-3781 Gary@MetroConcreteScanning.com www.MetroConcreteScanning.com**

**PAYMENT IS REQUIRED ON SITE ONCE WORK IS COMPLETE.** Credit Card, PayPal or Check accepted.  
Please complete **CREDIT CARD AUTHORIZATION FORM** if you wish to pay via credit card.

**24 Business-Hour Cancellation Policy Notice:** Customer will be charged if work is cancelled within 24 business-hours of scheduled appointment.

### **Contractor/Client Notes:**

- PVC conduit is difficult and in most cases impossible to view using GPR technology. Pan decks are very difficult to scan, and in most cases impossible to trace metal below the top layer of pan.
- Have all scan areas laid out prior to technician's arrival.
- GPR cannot be performed on slabs with corrugated metal or recycled concrete.
- Our 50/60 Hz Electromagnetic Sensor (EM) only works if conduits in the slab are 'active,' with high voltage current running through the circuit. If the current is not 'flowing', the sensor will not detect electrical wires. Low voltage can't be detected with this sensor.
- Think of alternative locations for cores if scanned areas are not clear.
- Ceiling scans may necessitate customer supplied scaffolding/lifts and require twice as much time as floor scans.
- Verify that penetrations will occur in sections of the slab less than 12" deep. Deeper concrete may require X-ray or scanning on both sides of the slab.
- Roof penetrations require an area of at least 3 x 3 feet, cleared of gravel and foam. Typically, roof penetrations necessitate additional time and coordination with the general contractor, building engineers, roofers, drillers and other trades people.
- A representative from your company should be present to review the results once scanning is complete.
- Do not drill within 1 1/2" of any marks.
- Core hours Monday – Friday 6:00 to 2:00pm. Overtime rates apply after hours and weekends.

### RELEASE OF LIABILITY/AUTHORIZATION

In consideration for being able to participate in GPR (Ground Penetrating Radar) scanning of concrete, Releaser, (company name or your name) \_\_\_\_\_, for himself, his/her legal representatives, heirs and assigns, releases, waives, and discharges Metro Concrete Scanning Corp., it's officers, their employees, from all liability to Releaser, legal representatives, heirs and assigns, for any and all loss or damage, and any claim for damages resulting from the use and reliance of GPR data provided or reports presented. Depth of exploration is dependent upon the electrical properties of material(s) inspected and interpretations are opinions based on judgments made from those acquired radar signals and/or other data. Metro Concrete Scanning, therefore, does not guarantee the accuracy or correctness of interpretations. Metro Concrete Scanning will not accept liability or responsibility for any loss, damage, or expense that may be incurred or sustained by any services or interpretations performed by Metro Concrete Scanning. GPR scanning cannot distinguish the difference between a single rebar, conduit or post tension cable 100% of the time. It can only detect the center and approximate depth of targets. Releaser assumes full responsibility for the risk of all loss to person or property by using data presented by Metro Concrete Scanning. Releaser further agrees that he has carefully read the forgoing release agreement, knows and understands the contents and signs this release agreement as his own free act. I have read and understand the terms of release of liability and authorization form and agree to be bound by its terms, conditions and disclaimer.

Because depth of exploration is dependent upon the electrical properties of material(s) inspected and interpretations are opinions based on judgements made from those acquired radar signals and/or other data, Metro Concrete Scanning does not guarantee the accuracy or correctness of interpretations and Metro Concrete Scanning will not accept liability or responsibility for any loss, damage, or expense that may be incurred or sustained by any services or interpretations performed by Metro Concrete Scanning or others. GPR scanning can not distinguish the difference between a single rebar, conduit or post tension cable 100% of the time. It can only detect the center and approximate depth of targets. This release serves for this job and all future jobs with said company/releaser.

Releaser agrees that if any portion of this release and waiver agreement is held invalid under the laws of the state MD, VA and/or Washington DC, those parts that are not held invalid shall continue in full legal force and effect.

Metro Concrete Scanning is not responsible for any loss or damage arising out of the use of, or reliance on the data collected or the report presented.

If the scanning takes longer because of extended coverage or as a result of the area not being prepared, an additional \$150.00 charge will be applied for each additional hour per man/machine. Price \$150.00 per hour. Each site visit is a 4 hour minimum of \$600.00. Off hours and weekend work are higher rates. Call for pricing when scheduling. **24 Business-Hour Cancellation Policy Notice:** Customer will be charged if work is cancelled within 24 business-hours of scheduled appointment.

I have read and understand the terms of the release of liability and authorization form and agree to be bound by its terms, conditions and disclaimer.
